

Rittal – Case Study

Laborie Medical Technologies - Urodynamik

Laborie Medical Technologies Inc., established in 1967 in Montreal, Quebec, Canada, is a manufacturer of computerized urodynamics equipment for the diagnosis and treatment of incontinence. As a pioneer in wireless urodynamics technology, Laborie's products are being used by urologists and uro-gynecologists. The products of the company are well established in Canada as well as in the United States.

With its product series Aquarius XLS and XLT, Laborie Medical Technologies relies on Rittal's expertise. For these products, Rittal supplies a complete solution consisting of the operating housing VIP 6000 or Optipanel, a TS 8 enclosure and the support arm system CP-L.
